

**CENS**  
**DIGITAL**

# Introduction

Evolution in gunshot hearing protection continues with the CENS® ProFlex electronic modules combined with unique multi-softness custom fit earpieces. This new unique design combines superb functionality with an eye catching appearance, and this latest development leads the trend towards obstruction free, comfortable custom noise suppression for today's shooter.

The CENS® ProFlex is also suitable for use with both rifle and shotgun shooters. Made from flexible, medical-grade silicone material, these digital, ultra soft noise suppressors are designed to be extremely comfortable over long durations, whilst still providing the excellent suppression you expect from CENS® digital. The passive & electronic module is removable making cleaning a simple effective operation.

All Electronic modules are standard 312 Electronic modules with 220 hours but are all upgradable to the CENS® ProFlex+ has a slightly deeper top tray that allows for the size 13 battery, which almost doubles the battery life compared to the standard ProFlex 312 module. This therefore effectively halves the running cost and along with the larger battery size being easier to handle makes the ProFlex+ module unbeatable! The ProFlex+ higher profile design provides the user controls with better protection, making the module more durable during every day use.

A power upgrade kit is available for existing CENS® ProFlex users, that allows you to upgrade from the standard 312 battery to the 13 battery.

**ProFlex+ Features:**  
All of the ProFlex+ digital 1 features plus the following upgrades:  
13 battery type instead of 312.  
Approx 400 hours battery life instead of 220 hours.

*ProFlex+ Module*

## CENS ProFlex Passive

ProFlex Passive Earplugs combine the ProFlex multi-softness earpiece with a filtered passive module to provide cost-effective hearing protection with ambient awareness.

These earplugs can be upgraded to full CENS® ProFlex digital by purchasing the electronic module at a later date, allowing you to spread the cost of the earplugs and modules over time.

# CENS ProFlex Digital 1e

---

Featuring a fine tuned general shooting program, which boosts quieter sounds such as approaching birds and quarry to clear audible levels, giving you the edge on the competition.

## KEY FEATURES

<b>Push Button Volume:</b> <b>Soft   Medium   Loud   Extra Loud</b> Silicone mould	Digital DSP circuitry 312 battery type (Upgrade to proflex + available) Low battery warning indication

# CENS ProFlex Digital 1

---

Featuring a fine tuned general shooting program, which boosts quieter sounds such as approaching birds and quarry to clear audible levels, giving you the edge on the competition.

## KEY FEATURES

<b>1 Program :</b> <b>ALL ROUND AMBIENT AWARENESS</b> <b>Rotary Volume:</b> Easy to use volume control Silicone mould	Digital DSP circuitry Wind/noise reduction 312 battery type (Upgrade to ProFlex+ available) Activation melody Low battery warning indication
--	--

# CENS ProFlex Veld

---

Features a program push button which switches between the following programs:

**Program 1:** Designed for **VELD** hunting this program provides good all round ambient awareness with programming modifications to reduce noise interference.

Typically used in a **BUSHVELD** hunting scenario's where one needs to hear what's in the bush and less of the underfoot sounds and rustle of clothing.

This configuration also helps by amplifying sounds such as wings flapping, thus providing the shooter with advanced warning of approaching quarry.

**Program 2:** Optimised for **RANGE SHOOTING** where there are continued shots. This system has been designed to allow more flexible noise suppression while still amplifying ambient sounds. This program provides extra amplification for sounds like wing beats, approaching game.

Also has the addition of the wireless input mode from the SRC harness which comes as standard. The SRC Harness is a loop worn around the neck under the clothing and out of site. This allows for MP3 use.

SRC harness can also be ordered separately for two way radio use.

CENS®® ProFlex digital are not suitable for very small ears. CENS®® digital (acrylic) can be made as an alternative.

## KEY FEATURES

**2 Programs :**

**VELD**

**SHOOTING RANGE**

Silicone mould

**Rotary Volume:** Easy to use volume control

Digital DSP circuitry

Delayed auto start system (5 seconds)

312 battery type (Upgrade to ProFlex+ available)

Activation melody

Low battery warning indication

# CENS ProFlex+ Competition

---

Includes 2 programmes

**Program 1:** A fine tuned general shooting program, providing ambient awareness for a natural listening experience.

**Program 2:** Solid plug simulation, muting ambient sounds preventing distractions around the shooter

## KEY FEATURES

<b>2 Programs :</b> <b>ALL ROUND AMBIENT AWARENESS</b> <b>MUTE</b> <b>No Telecoil _ as per regulations</b> <b>Rotary Volume:</b> Easy to use volume control Silicone mould	Digital DSP circuitry Delayed auto start system (5 seconds) 312 battery type (Upgrade to ProFlex+ available) Activation melody Low battery warning indication

# CENS ProFlex Hunter 2 Ultimate Sportsman

---

CENS® ProFlex+ Hunter 2 are designed especially with the Shotgun, Rifle and Handgun marksman in mind. The brand new state-of-the-art circuitry inside every CENS® Hunter 2 is capable of suppressing all gunshot noise generated by which ever discipline the shooter partakes in.

Automatic wind reduction on all programmes.

Features a program push button which switches between the following programs:

**Program 1:** Designed for rifleman primarily this program provides good all round ambient awareness.

**Program 2:** Designed for VELD hunting this program provides good all round ambient awareness with programming modifications to reduce noise interference. Typically used in a BUSHVELD hunting scenario's where one needs to hear what's in the bush and less of the underfoot sounds and rustle of clothing.

**Program 3 Mute:** plug simulation, muting ambient sounds preventing distractions around the shooter.

Typically used in a bushveld hunting scenario where one needs to hear what's in the bush and less of the underfoot sounds and rustle of clothing.

Also has the addition of the wireless input mode from the SRC harness which comes as standard. The SRC Harness is a loop worn around the neck under the clothing and out of site. This allows for MP3 use.

SRC harness can also be ordered separately for two way radio use.

Designed for semi auto / automatic gunfire (3 Gun, Handgun, Combat Rifle, Close Quarter Shooting)

Every pair is also supplied with Wind Shields that fit over the ear, cutting down wind noise even further when using a high chair or when shooting in severe conditions.

## KEY FEATURES
